General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajess.com/index.php/AJESS/editorial-policy>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | <p>The Abstract part should include recommendations, the title needs modification as I gave at the paper. I have found a mismatch between the topic and some parts of the paper (Example: the cause or the impact)</p> <p>Better to give to the language expert Wrong relationship formulated and generalized between students result and anxiety at the background part A bite confusion between the title and the data analysis technique the writer employed(qualitative and qualitative) The design part must be revised. I have seen a wrong selection of design (what does it mean concurrent triangulation?) The quantitative part (graphs) is very weak to answer the research equations The findings, conclusions, and recommendations did not go in line The sample size determination has to be put clearly based on scientific bases.</p> | |
| Minor REVISION comments | Referencing styles and quotations | |
| Optional/General comments | Have a look at the article(I put all comments there) | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
