

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_94363
Title of the Manuscript:	THE USE OF COMPLETE BLOOD COUNT AS INFLAMMATORY BIOMARKERS IN PATIENTS WITH COLORECTAL CANCERS IN ENUGU STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY TEACHING HOSPITAL, PARKLANE ENUGU
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of „**Jack of Novelty**“, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajmah.com/index.php/AJMAH/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	As a prerequisite investigation requested from all colorectal cancer patients, a full blood count is performed before treatment and during treatment and poor parameters adversely influences the outcome of cancers. The present study proposes the concept that biomarkers such as CBC (Complete Blood Count) and ESR (Erythrocyte Sedimentation Rate) can be used as a prognostic tool in early detection, treatment and monitoring the disease progression in these subjects.	
Minor REVISION comments	There are no minor revisions to be done.	
Optional/General comments	This is a complete manuscript much well written, with high level of content and too much didactic.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
