

Review Form 1.6

Journal Name:	Asian Journal of Orthopaedic Research
Manuscript Number:	Ms_AJORR_94419
Title of the Manuscript:	Anatomical and surgical basis for the treatment of paralytic knees
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajorr.com/index.php/AJORR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>The aim of this review is to highlight the anatomical and surgical basis for the treatment of paralytic knees that lead to a grave functional handicap because of its intermediate situation in lower limb. Paralytic knee disease affects muscular balance and osteoarticular growth to the point of sometimes compromising the possibility of standing and walking. Combined with a good knowledge of the etiologies, it enables the bases of the orthopaedic treatment to be defined. Orthopaedic surgical treatment of the consequences of knee paralysis is varied (tenotomies, lengthenings, transfers). The article is of interest for the academic community. English is good. Article should be published in this form.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
