PART 1: Review Comments

	<p>Reviewer's comment The resulting mean of the optimal solutions of minimization problems, whose objective functions are the uncertainty like functionals, are known as uncertainty mean.</p> <p>The uncertainty mean satisfies all the basic properties of the classical means, weighted homogeneous mean as well as many others are special cases of uncertainty means.</p> <p>The indeed the paper deals with comparison property and asymptotic demeanour of the uncertainty mean.</p> <p>By the help of homogeneous and weighted means, it is defined the asymptotic demeanour but it may be useful to derive classical inequalities. Also the comparison theorem for the uncertainty means are also developed under the optimality conditions.</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. The main motivation and contribution should be highlighted at the end of the Introduction. 2. At the end of the Introduction, which theorems correspond to which conclusions need to be clearly stated?. 3. In the references department, all references should be cited in the text in sequence. For example, the first cited item should be ref. [1]; then comes ref.[2].... Etc. The new references since last 10 years ago should be added.
