

Review Form 1.6

Journal Name:	Asian Journal of Research and Reviews in Physics
Manuscript Number:	Ms_AJR2P_93629
Title of the Manuscript:	Universe before Big Bang
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajr2p.com/index.php/AJR2P/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This work is a short but comprehensive review of the Ekpyrotic scenario, alternative to inflation and provide a view to the physicists about the state of the universe before the big bang. This theory addresses some of the puzzles of the ΛCDM model (flatness, etc), but arise some new problems. 1) There are many spelling errors in the text. The authors should correct these. 2) In a few typos (such as (3) or (8)), some of the symbols are undefined. 3) The potential in figure 1 is not symmetric. I expected that, since the Ekpyrotic scenario is periodic, the potential must be defined by a periodic function. This is more clear in figure 2.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
