

Review Form 1.7

Journal Name:	Asian Journal of Research in Agriculture and Forestry
Manuscript Number:	Ms_AJRAF_95040
Title of the Manuscript:	Agromorphological Characterization of a Rubber Tree-Teak Agroforestry System In Central Côte d'Ivoire
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. It is essential to conduct this research study to determine the efficiency and effectiveness of the teak-rubber agromorphology system. The research obtained a negative effect on the growth of rubber when intercropped with teak. The morphological growth of teak is allegedly faster than rubber, where the uptake of soil nutrients and surrounding nutrients becomes a competition between the two plants. The advice given at the end of the manuscript is correct by trying to find rubber plants clone that are relatively tolerant to the presence of teak.</p> <p>2. Ok</p> <p>3. Ok</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. As many as 8 of 17 references are out of date but still relevant for this article. Some references related to the agromorphological system of rubber with other plants, if any, can be added.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Well-Enough	
<p>Optional/General comments</p>	Nice manuscript	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
