PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This study has been well carried out, the results are interesting and contribute to the knowledge of the effectiveness of vaccines. Taking into account the current epidemic situation, this is of obvious interest.</p> <p>Because of the biological implications between past infection and vaccination (i.e. presence of antibodies), the visual presentation of the results is not straightforward. Therefore, a graphical representation of some of the results would be suggested (e.g. box-plot); it would make the text easier to read.</p>	
Minor REVISION comments	<p>There are about 20 comments in the attached file. Some of the comments concern the substance of the study, others concern questions of presentation, and others are suggestions for clarification or rewording.</p>	
Optional/General comments	.	

PART 2:
