### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>This is an interesting, easy to read and informative review of the situation in this African country.</b>	
<b>Minor</b> REVISION comments	On the clinical aspects I would suggest adding the presence of fever among the key features. I also think it would be appropriate to change the term seizures to seizures (not all epileptic seizures are motor seizures). Also in the characteristics of the cerebrospinal fluid, moderate hyperproteinorrachia is often found. I also think it would be interesting to know which therapeutic approach is usually used and not to leave it as a temporary and adequate approach.	
<b>Optional/General</b> comments	Congratulations, this is a good and interesting paper.	

### PART 2:
