Title of the Manuscript:	MATURE WISTAR RATS' SPLEEN AND LIVER HISTOMORPHOLOGICAL CHANGES RELATED TO THE DURATION OF ATRAZINE EXPOSURE
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalajrimps.com/index.php/AJRIMPS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Not placed conclusion and future scope of the work. Had not mentioned about ethical committee permission. Work looks like separated from a major research work. Can include the findings report through a separate table. No need to compare the work with already available article information but instead it would be highly appreciable if you could show the superiority of your work with the available reference works.	
Minor REVISION comments	Re arrange the references from 2022 to older dates of work. It is mixed and irregular.	
Optional/General comments	Work is good and all the very best for future presentations and research works.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u> Yes as animal sacrifice is involved. Need to take proper ethical permission before conducting it
