

Review Form 1.6

Journal Name:	Asian Journal of Research and Reports in Ophthalmology
Manuscript Number:	Ms_AJRROP_94463
Title of the Manuscript:	Subepithelial corneal infiltrates following intravitreal injection of Ranibizumab
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrop.com/index.php/AJRROP/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The authors should spell out all the words when they are mentioned for the first time: e.g FA, OCT, etc. Figure 1 legend: a space should be inserted between showing and intraretinal. If possible, a scale should be added in figure 1.	
Optional/General comments	The manuscript is well written, easy to read. The case study is about a patient, 60 years old, with diabetic macular edema, treated with Ranibizumab. It is possible that the injection induced an immune reaction, that affected the cornea with the formation of subepithelial infiltrates. The subepithelial was treated with success with antibioatics and steroids.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
