PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I want to say kudos to the authors on a careful research plan and execution. The work and the model are well thought out. My suggestions on this paper can be found in the minor section which is basically on the choice of language while expressing people' s work in the light of the current.	
Minor REVISION comments	Page 4, the last paragraph states and I quote "These researchers failed to estimate the effects of the covariate as the diseases progress." My emphasis is on the word "failed", I think we could recast it as " The researchers did not address/consider the effects of..." Last paragraph of page 5 states: The state of patients were recorded by the medical personals. My emphasis is on the last word "personals" I try to look up the word myself but nothing like that came up, I think the closest option could be "personnel".	
Optional/General comments	The paper is a good read.
