

## Review Form 1.6

|                          |  |
|--------------------------|--|
| Journal Name:            | Asian Research Journal of Mathematics            |
| Manuscript Number:       | Ms_ARJOM_94068                                   |
| Title of the Manuscript: | Another Look of Rings Domination in Ladder Graph |
| Type of the Article      | Original Research Article                        |

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy> )

### PART 1: Review Comments

|                                     | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| <b>Compulsory</b> REVISION comments | - What is the author meaning in page no. 3, last line about:<br><b>Hence (i), (ii), and (iii) are satisfied</b><br>Where are these conditions?   |   |
| <b>Minor</b> REVISION comments      | - In the 1st page, the end of paragraph no. 1: <b>What about the undirected graph which has (2n+1) vertices, i.e. odd vertices?</b><br>- In page no. 4, exactly Theorem 3.3: <b>What about a ladder graph of order (2n+1), i.e. ladder graph of odd order?</b>   |   |
| <b>Optional/General</b> comments    | - Some references without the year of published, for examples" the references no. (6, 7, 9, 10, 11 and 12). I suggestion the author to add the year of published.<br>- The number of references equal to 12, is very low, I see that the author go to the another references.<br>- I suggestion the author to add the following 2-references:<br>1. Tashtoush, M. & Jawarneh, M. (2011), c–Maximal Ideal of Finite Rings, <i>International Journal of Algebra</i> , 5(3), 135–138.<br>2. Tashtoush, M., (2008). Weakly c–Normal and cs–Normal Subgroups of Finite Groups, <i>Jordan Journal of Mathematics and Statistics</i> , 1(2), 123–132. |   |

### PART 2:

|  | Reviewer's comment  | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) |   |

### Reviewer Details:
