

Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_94345
Title of the Manuscript:	TOPOLOGICAL NEAR GROUPS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper starts with a some preliminary definitions that look correct but they explain nothing. For example, consider the first definition: Let $X, X' \subseteq O, B \subseteq F$. Set X is near X' if and only if there exists $x \in X, x' \in X', \psi \in B$ such that $x \sim \psi \circ x'$. What are sets O, B, F ? What is the relation \sim ? Without proper explanation one cannot read the rest of the paper. The same applies to definition 2.4 and 2.7. I cannot understand what all these things are about, I suspect that O stands for a topological space but I am not an explorer but merely a humble reviewer!	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
