PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">• First line: pandemic did not reveal it caused a global emergency• Corono-viral enemy please rephrase• Please change sentence beginin the worst clinical scenario: poorly written and implications are its worse because it affects males which is wrong.• Rephrase the main pathophysiological way sentence this is grammatically poor.• 'As for the primary randomized studies' this is incorrect please change• Explain term PF4 factor Overall this is poorly written, non-comprehensive and I do not think it functions as an editorial on what is a complex facet of COVID management. It does not in any meaningful way compare the risks with the benefits from vaccinations or the underlying mechanism and ignores much of the literature.	
Minor REVISION comments	<ul style="list-style-type: none">• ARDS please use term and put ARDS in brackets• Change to 5 million deaths globally#	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
