### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>This is a letter to the editor addressing the issue of cardiovascular and thrombotic complications of COVID19 vaccines and the following modifications should be made: The title should read "Cardiovascular and thrombotic complications after covid 19 vaccination". A brief explanation of microthrombosis as a coadjuvant factor of coronary and vascular thrombosis should be included, for which I recommend reviewing: Sieiro-Santos C, López-Castro J. Post-coronavirus disease syndrome and disseminated microthrombosis: the role of the von Willebrand factor and antiphospholipid antibodies. Clinics (Sao Paulo). 2021 Mar 24;76:e2784. doi: 10.6061/clinics/2021/e2784. Finally, endotheliitis should be discussed as a causal factor of postcovid 19 complications for which I recommend reading: Lopez Castro J. Post-COVID-19 Syndrome (PC19S): Chronic Reactive Endotheliitis and Disseminated Vascular Disease. Acta Med Port. 2020 Dec 2;33(12):859. doi: 10.20344/amp.14612. With these modifications the letter can be published.</p>	
<b>Minor</b> REVISION comments
