

Review Form 1.6

Journal Name:	Biotechnology Journal International
Manuscript Number:	Ms_BJI_94833
Title of the Manuscript:	PRODUCTION OF ORGANOMINERAL FERTILIZERS BASED ON LOCAL RAW MATERIALS AND NITROGEN FIXING MICROORGANISMS
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalbjournal.com/index.php/BJI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The abstract needs a general revision. The main results are given in the abstract. The manuscript needs literary, grammatical, and scientific editing (Poor English). - As much as possible, spelling and grammar flaws were corrected and rewritten (Blue color in manuscript). Some words or sentences must be deleted (Red highlight in the manuscript). In some parts, comments have been laid out. Refer to the attachment file. Please compare the original manuscript with the corrected one. Abbreviations must be defined and must be determined once in the first use. Please review the article and pay more attention to the comments that have been made. The article's discussion section will be written with more regularity and coherence. The results must be statistically reviewed and compared. Results cannot be documented without statistical work. There is a need for detailed statistical analysis and specifying the type of test design and significance level. Materials and methods should be written carefully and with descriptions and experimental designs. In the material methods, "Microorganisms of the type Azotobacter were used to fix molecular nitrogen from the air," The genus, species, and type of strains used should be accurately identified in terms of biochemical and molecular tests. The amount and method of use and their stability and survival during the period of use should be specified and expressed. There is a need for scientific and general revision.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
