PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none">1. The referencing is very poor.2. Why did the author choose the specific value of the Hubble constant = 71.0 (km/sec)/Mpc rather than any other value such as 65 or 73?3. In a revised version of their manuscript, authors must include a discussion section, which is now unaddressed and may be called "Discussion and conclusions". The implications of the current study should also be clearly presented.	
Optional/General comments	I have reviewed the manuscript (MS) "The distances between, and the formation times of, the galaxies" submitted for possible publication in International Astronomy and Astrophysics Research Journal and found that the results are novel and deserve publication following minor revisions. The present work aims to determine various distance (Da, Do, Dm) between GZ galaxy and the MW galaxy.
