PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	"Extension" should be included in the title of the manuscript. Therefore the title should be "Policy initiatives for improving competencies of Agricultural Extension Graduates for promotion of agricultural innovation" This is necessary because the study is on extension services; keep in mind that there are other branches of agriculture. The study lacks statistical data interpretation: what is the sample frame?; how did you arrive at the sample size?; what percentage of respondents did what?; the tables lack source of data; the method of analysis was not properly stated; the discussion as regards to past studies should be improved upon, ie, more authors should be cited in the discussion so as to show an in-depth review of literature.	
Minor REVISION comments	The manuscript should be properly edited; there are many typographical errors. The references should be reviewed; it was haphazardly done.	
Optional/General comments	Nil	

PART 2:
