

Editor's Comment:

I read the manuscript "**Impacts of climate change on water stress in West Africa: Case study of the N'zi (Bandama) watershed in Côte d'Ivoire**" and the other documents including the peer review and the revised paper.

I think it is suitable to accept this paper for publication in our Journal after it was revised.

Editor's Details:

Dr. Baohui Li
Associate Professor, North China Electric Power University, China.
