

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_94355
Title of the Manuscript:	Effect of Osmotic Dehydration on drying method and physicochemical Properties of Pineapple (Ananas comosus.var.Queen)
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The article is poorly written .The first sentence in abstract reveal the no competence of author because have written that osmotic dehydration was carried out in hot air instead to write in sucrose solution .</p> <p>The degrees Brix is not clearly explained because the authors must indicate that is 1 gram of sucrose in 100g of solution but not a mixture of 1 kg of sucrose and one kg of water . For example to prepare a solution of sucrose at 60°BX one must weigh 60g of sugar and complete in scale with water until 100g and check the value of °BRIX using refractometer .</p> <p>On other hand the authors have not use the mathematical formula, basing on azuara model or other known model , to determine the values of water loss and solids gain.</p> <p>Concerning the statistical part the authors have not indicate the levels of factors to use the CRD in the context of RESPONSE SURFACE OF METHODOLOGY and particularly the details of analysis variance .</p>	
Minor REVISION comments		
)		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
