PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Title I propose to clarify the meaning of the term: IBA (indole-3-butyric acid) in the title and in the Abstract.</p> <p>Key words In the keywords, it should appear: "indole-3-butyric acid", in addition to IBA.</p> <p>Introduction -In the first paragraphs, the bibliographic citations that support the approaches do not appear. - Both at the end of the Introduction and in the Abstract, the objective of the article should appear. I suggest reflecting the bibliographic sources and the period used to search for information. The term "<i>et al.</i>" is always written in italics. I believe that the paragraphs should not be so large, for the best reading and understanding of the content.</p> <p>References - In references where there are more than six authors, after the sixth it is written: "<i>et al.</i>" (e.g., citation 14). Ahkami AH, Melzer M, Ghaffari MR, Pollmann S, Javid MG, Shahinnia F <i>et al.</i> -I propose to update, as much as possible, the list of references; fundamentally, with citations from the last five years.</p>	
Optional/General comments
