

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_94686
Title of the Manuscript:	GENETIC PARAMETERS AND SELECTION STRATEGIES FOR BREEDING CLIMATE SMART WHEAT
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript deals with a significant topic, developing climate-resilient wheat varieties. This is crucial in the context of climate change. In my opinion, the manuscript needs to be restructured. There are discussions on the additive, dominance, and epistatic components of genetic variance of wheat traits. I suggest the authors rearrange the text into the above three categories of studies. You can add a small discussion part related to what you understood from the literature and what are limitations of your study. The conclusion part looks solid.	
Minor REVISION comments	Grammar needs to be corrected.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
