PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Authors have studied allelopathic potential of some fruit trees on weeds. They have tried seven fruit plants and found best suppression of weed germination, radical and plumule growth of barnyard grass and green amarynth. These results are of very interest. In the material and methods author have written statistical analysis has been done and CD at 5% is calculated. They have not shown values of CD in the table so that the results may be compared for significance. These values must be added in the table. Language of the paper is good. Paper may be accepted after minor corrections as mentioned.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
