

Review Form 1.7

| | |
|--------------------------|---|
| Journal Name: | International Journal of Environment and Climate Change |
| Manuscript Number: | Ms_IJECC_94958 |
| Title of the Manuscript: | Assessment of Genetic parameters for yield and its associated traits in Greengram [Vigna radiata (L.) Wilczek] |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| <p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p> | <p>Autors investigate some quantitative and genetic parameters of greengram. This crop is significant and the establishment of genetic variability is important for the creation of new varieties with high productivity. In this sense, the research is useful and significant. All tested genotypes exhibited significant variances for all characters which show their potential for inclusion in future breeding programs. The abstract of the article is comprehensive. The structure of the manuscript is appropriate.</p> | |
| <p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? | <p>In the "Material and methods" part, it is necessary to cite the statistical method used. Figures 1 and 2 should be cited in the text. In Figure 1, the colors corresponding to the two coefficients of variation should be specified.</p> | |
| <p>Optional/General comments</p> | | |
