PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is well written and generally clear but there are some minor points that need to be addressed. 1) The method used for assessing the visual acuity has not been explained clearly in some sections is described as counting fingers in others is called Snellen BCVA, few lines describing the assessing method should be added. 2) Some of the references are quite dated (7 to 12 years old) they should be changed with more recent papers if possible. 3) The method of intervention is clear but very brief, adding details may help the comparison with similar cases.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
