

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Plant &amp; Soil Science</a>
Manuscript Number:	Ms_IJPSS_93683
Title of the Manuscript:	Genetic Variability Studies for Yield and Related Attributes in Finger millet ( <i>Eleusine coracana</i> ) Genotypes
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy> )

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	In revising your manuscript, I would like to highlight some details in order to improve it. One point that I want to mention is that you don't include the meaning of the abbreviations in the manuscript. It would be preferable if you clarified their meanings to make them more understandable to the reader. Another crucial point I'd like to bring up is the unit "lakh" that you use in the text. I propose to use an international unit. Your research study will be published in an international journal, so it would be better to use terms that are familiar to all readers.	
<b>Minor</b> REVISION comments	I noticed a few spelling errors as well as a different font size for some phrases. I recommend revising the text to find and correct errors. Last but not least, I realized that you need to rewrite some sentences in the "Result and Discussion" section to be more comprehensive.	
<b>Optional/General</b> comments	The overall manuscript is well written and structured, with proper use of the English language. Your study's findings are intriguing and promising for future research.	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

### **Reviewer Details:**
