

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_94774
Title of the Manuscript:	Influence of plant resistance in certain genotypes of Greengram on insecticide tolerance on Spotted Pod Borer, Maruca vitrata (Geyer)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The article is well structured but I am concerned mainly about the abstract. You have to improve the presentation of the abstract to express the full understanding of the research work as a summary. State what was done first, how the study was undertaken, the method used, the major findings and brief conclusion. Kindly recast your abstract to present the summary of your research following the outline presented.</p> <p>The literature of the research is scanty as presented in the introduction section. I expect that more literature be reviewed and the number of citations increased with recent works in the study area. The number of citations should not be less than twenty-five.</p> <p>In the materials and method section, there were no mention of the materials used in the study and the general method employed before going to specific study.</p> <p>I suggest that all the abbreviations used in the study should be explained at first use and a list presented at the end of the work after conclusion.</p> <p>The conclusion should be recast to present the major findings of the research and their implications.</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
