PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>First of all, thanks for your kind efforts writing this article. 😊</p> <p>Please check the following points</p> <ul style="list-style-type: none"> - I can't see the familiar skeleton of a manuscript or review article!! 1)Introduction 2)Evolution of lingual orthodontics And so on till 10) Conclusion, that is very unusual!!!! -You should state which scientific data bases you have searched for your article and what search terms did you use and the results of that search - The way of numbering is also very unusual; we mostly use the Latin numerals!!! - Heading 5,6 and 7 why are they referenced?!!, we don't use references for titles - No single style used for Bibliography generation and there are references from the 1970s & 1980s (That is too old and obsolete) - The included figures are with poor images quality or resolution - The figures used seems to be downloaded from the internet and this is not acceptable, You should take your own photographs - The English language is weak which unfortunately weakens the scientific idea and makes it hard to ge the clue about the topic -There are many typos with punctuation errors which have to be avoided in academic writing 	
Minor REVISION comments	<p>Abstract: Line 10, please change (recent scenario) with (recent treatment modality)</p> <p>Introduction:</p> <ul style="list-style-type: none"> -First four lines (Too much {and} in the paragraph) -Line 9, the use of word stigma here seems to be incorrect -Fig 4 you should state on the image which is (a) and which is (b)
