Compulsory REVISION comments	The paper is about Orlicz mixed inequality which is extended to the series of multilinear forms. The paper is treated only theoretically, there is no explanation about the extension : what is its benefit, where can be used ? etc. There are no conclusions. The paper does not present a quantitative research. It is based on ideas alone. No conclusions are there. Good references. No language problems.	
Minor REVISION comments	Few of mathematical expressions need to fit in one line. Suggest to end the paper with a short conclusion.
