PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript has innumerable grammatical errors which needs thorough language editing for better interpretation. The COVID-19 impact on ophthalmic affections have been detailed and it has been widely presented already in literature. It is suggested to highlight if any new information or finding related to the impact has been identified and focus on its presentation. The keywords used are not consistent with the title and content of the manuscript. Kindly consider to add ophthalmology related other keywords.</p> <p>The title is unclear and needs to be more precise and informative.</p> <p>The article lacks any information on abbreviations used in manuscript.</p> <p>The article uses word covid-19 in various form of representation in the manuscript text at various points. A consistent use of the related word is recommended.</p> <p>The abstract lacks any conclusion. The abstract section presents no information on the relevant ophthalmology affections and its impact or outcomes. Suggest to rephrase the same</p> <p>The introduction and abstract have repeated and copied text which needs thorough editing and rephrasing. It lacks proper reference quotes for certain facts presented. Kindly clarify and provide a reference for the same. Also, the introduction does not present related literature support on the ophthalmology aspect of covid-19 related ailments. The introduction can be better phrased with relevant parameters being highlighted</p> <p>In methodology, there is ambiguity in presentation of the data. The authors indicate the comparison of data from the year 2019 and 2020. However, they have indicated and included the 2020 data from the time of March 23,2020 onwards. Kindly clarify the discrepancy in your data presentation and methodology. There is no information in methodology regarding the use of tests of significance or evaluation software used for statistical analysis.</p> <p>The description of ophthalmology ailment lacks a consistent method of detailing. A tabulated review indicating the relevant symptoms, signs on examination and possible diagnosis can be presented for a reader-oriented manuscript. The available literature can also be tabulated with salient features according to the diagnosis or ailment presented.</p> <p>The table and figures are lacking for a review article.</p> <p>The article lacks in use of comparative studies to pre-covid and post-covid differences in ophthalmology affections if any which have been identified.</p> <p>The study does not elaborate on the limitations.</p> <p>The manuscript lacks any concluding remarks or observations and it also lacks in any recommendations or guidelines for other researchers to manage the ophthalmic affections.</p> <p>Overall the manuscript is suggested for revision.</p>
