PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper deals with a case of an 18-year-old girl presenting with bronchospasm. Her complaint was caused by asthma. The case is interesting; however, there are some comments which need to be taken into account: 1- The abstract is general. The case of the patient should be mentioned 2- The lung function tests were the key for the diagnosis in this case. This should be highlighted in the case presentation and in the title. 3- In the case presentation, please add, if possible, the results of some other investigations such as chest X-ray, skin allergy tests.... 4- Please add the initial treatment after the diagnosis of asthma (inhaled corticosteroids?)	
Minor REVISION comments	Please do mention the figures in the main text. The Fig.3 is useless. It is better to delete it.	
Optional/General comments	The case report deals with the diagnosis of asthma in an 18-year-old girl with bronchospasm. The main point is the contribution of the lung function tests and this has to be better emphasized by the authors.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
