PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Abstract I propose that the objective, the methodology used and a synthesis of the results and conclusion be written. Key words I suggest that they remain: Hirschsprung's Disease, aganglionic, ganglion cells, intestinal obstruction. Assess whether the rest are terms closely related to the subject. Introduction At the end it should reflect the objective of the article. - The methodology used to prepare the work is missing. It must refer to the information sources and the period consulted, as well as the keywords (descriptors) that served to rescue the information the years reviewed. References -You should check that in all references, journal titles are abbreviated according to international standards. - I believe that the bibliography used should be updated; fundamentally, of the last five years, if possible.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
