PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an important topic with great clinical significance. I salute the attempt of the authors to address the topic. However, this is review article and hence anyone who reads it should have an overview of the topic with some depth. Unfortunately, this article does not seem to address the issue. It lacks depth and details expected for the audience for which this is addressed, The issues are addressed in a simplistic manner suitable for simple medical student reading. It requires more detailed discussion of the effects of diabetes and hypertension on the placenta-biochemistry, physiology, histology, anatomy, pathology and clinical implications. Some of these areas were touched but not in detail The references are also very old. No references from the last 5 years	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
