PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Well written manuscript. Are all the patients on a state sponsored insurance? Do any of the patients pay out of their pockets for chemotherapy drugs and its administration? Did any of the cancer patients suffer from Covid? Did they report covid in their families or neighbourhoods, that prevented them from reaching the hospital? It may be worthwhile to provide some statistics of the number of cancer patients seen in a typical year (non-Covid), along with the number of cancer chemotherapies administered in a typical year (non-covid). There is repetition of several statements – please delete such statements or modify them to remove redundancy. It is pertinent to avoid the words: we, us, our ours in a scientific paper. Instead, use passive voice as suggested along with this study, only if it is imperative. There are several studies in this regard from the Indian sub-continent: please include them in your discussion.	
Minor REVISION comments	I have corrected the manuscript as much as possible. Please pay attention to the comments.	
Optional/General comments	none	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
