

## Review Form 1.6

Journal Name:	<b>Journal of Cancer and Tumor International</b>
Manuscript Number:	<b>Ms_JCTI_94708</b>
Title of the Manuscript:	<b>Histopathological Characteristics of Breast Lesions in a Tertiary Health Institution in Southwest Nigeria; A 9-year Review</b>
Type of the Article	<b>Original Research Article</b>

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljcti.com/index.php/JCTI/editorial-policy> )

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	No major revisions needed to manuscript. Data and discussion are sound with proper comparison with current literature. The outcomes of the data obtained are similar to previous literature.	
<b>Minor</b> REVISION comments	Some of the wording is a little bit confusing/not properly spaced out. For example in the results section of the abstract, the sentence discusses benign type, malignant neoplasms and invasive ductal carcinoma. In fact ductal carcinoma is a subtype of malignant neoplasm so there should be some form of differentiation so it is easier for readers to make distinction while reading. The same applies about the grading system.  A couple things that I believe should also should be discussed: 1) In your sample population, the majority of were in their 5 <sup>th</sup> decade. While similar to other studies, breast cancer tends to have increased incidence with age. Maybe a brief discussion why this has not been seen. 2) A dip in incidence was noted in 2018. This drop is not mentioned again later in the paper. Would discuss this and possible reasonings.	
<b>Optional/General</b> comments	Overall a good overview paper discussing the histopathology in breast lesions in southwest Nigeria.	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
