PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">The formulation of the problem has not been described at the beginning of the abstractIn the methodology section, it is necessary to add the characteristics of the experimental soil, irrigation system and pest control. information on rice varieties used in the experiment must be added	
Minor REVISION comments	<ul style="list-style-type: none">very old reference, look for the latest, at least the last 10 yearsreferences are still very minimal and have not used the Medeley or Zatero applications	
Optional/General comments	<ul style="list-style-type: none">The research idea is interesting, but it needs to be complemented by the characteristics of the soil in the experimental area. References need to be added because they are too minimal and still use very old references	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
