PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The current study tries to establish a causal link between environmental exposure to police officers and the incidence of acute respiratory tract infections. In my opinion, the study has many limitations: <ul style="list-style-type: none">- a small number of patients participating in the study- questionnaire is not showed- acute respiratory tract infections are not defined- long and useless introduction without relevant information-etc- other risk factors are not taken into account (eg, smoking, immune status, other diseases...- the discussion section can be improved	
Minor REVISION comments	-	
Optional/General comments	The study does not meet the value required for publication in this format/	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
