PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	An interesting paper but the following points need addressing: 1. Definite exclusion and inclusion criteria need to be mentioned, they are not very clear from the manuscript 2. The questionnaire can be elaborated upon, was it used before, had it been validated. Or was it conceptualised by the investigators and had it been used for the first time in this study. Can be included in annexure 3. The statistical methods and software used need to be mentioned in a separate column. 4. Having a table on demographics would be good. Also mention the other age groups apart from mentioning > 35 years	
Minor REVISION comments	1. Capital letters should not be randomly used in middle in a sentence 2. There should be uniformity in the usage of terms in some places it is advance maternal age whereas in some places it is advanced maternal age. 3. The manuscript needs some editing in language and grammar	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
