Minor REVISION comments	<ol style="list-style-type: none">1. Abstract – it will be better to provide a structured abstract – Introduction, methods, results, conclusions.2. The goal of the study – “to measure the frequency of dental patient visits before, during, and after (?) lockdown”. The study used two cohorts of patients – before and during the pandemic, therefore it is not clear why the authors formulated the aim including “after” also.3.
