

Editor's Comment:

I read all documents carefully and found the revision suitable for publication after considering the following comments:

1- References are old as also indicated by the reviewer. Authors should add relevant references above the year 2017 inside the text and in the reference list and discuss about them accordingly.

2- Some citations have typographic errors. Fr example, Neina (2020) within the text and Neina (1999) in the reference list while Neina (2019) is correct. Authors should take care about all citations within the text as well as in the reference list.
