

**Editor's Comment:**

It's ok for publishing, , with my following observations

The citations have to be not by numbers into the brackets, for example Trifu (2016), or (Trifu, 2016).  
NO references in the Conclusions part, there are only the author's opinions, ideas, forecasts....

The References are wrongly written: the authors in alphabetical order of their names (not first names:  
example, Abd Rasyid (2022) will be the first and the last one, Vroom, V.H. (1964).  
TNR 12, 1.5 lines and it is ok.
