PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper is very interesting with strong data support, it's just that it's still weak in the writing systematics. My suggestion is to present this article in a thematic form according to the title of the article. the themes include economic, social, environmental and wildlife habitat impacts. If this is done then this writing will be more interesting and easily understood by readers.	
Minor REVISION comments	in the abstract, you should briefly include related: 1) research objectives, 2) sources of information, and 3) the method you use in analyzing information sources so that this paper produces themes that answer the purpose of writing this article, and 4) the results of this study. in the introduction, you should indicate why the study is important which will lead to the research objectives.	
Optional/General comments
