

Editor's Comment:

Regarding the paper analyzing FDI in Bangladesh: it is ok for publishing, based on the observations of my colleagues.

One observation regards the length of the Conclusions. Maybe a part to become Findings, And, also in Conclusions , beyond the statistical instrument proving the relationships between the considered variables, to insist 2-3 propositions on the economic and social benefits of FDI on Bangladesh economy. It is a proposition in this sense.

OK again for this example of the rise of the Bangladesh economy!!
