Compulsory REVISION comments	<p>The following references should be written according to author guidelines: Freyre, Marcelino, Astrada, Blasco, Baigorria, Rozychi & Bernardi, 2003; Jimenez, Rossi & Sammán, 2015a; Praderes, Gladiana, García, Auris & Pacheco, 2009; Resende & Franca, 2019; Ribotta, Ausar, Morcillo, Pérez, Beltramo & León, 2004; Torres Gonzáles, Jiménez Munguía & Bárcenas, 2014; Vázquez Ovando, Rosado Rubio, Chel Guerrero & Betancur Ancona, 2009</p> <p>The following reference could not be found in the text O'Shea N, Arendt E, Gallagher E. (2014) State of the art in gluten-free research. Journal of Food Science. 79:R1067-76.</p> <p>Current references should be cited Some abbreviations are not understood. For example, The Vicia faba flour (HF), carob flour (HA). Headspace analysis (HA) and carob flour (HA) are expressed with the same abbreviation. Cite should be made to the identification of volatile compounds. The explanation about the identification of compounds with the use of the libraries provided by the software is also confusing. The identification of compounds of a complex nature, such as many of the those listed in the tables (for example: a-copaene, t-murolene among others) requires the use of standard compounds for their unequivocal identification. Searching the libraries of the software and calculating the KI is not enough. The authors should clarify this aspect. When standards of the compounds are not available, it should be indicated that the identification is tentative.</p>
