

Review Form 1.6

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_75970
Title of the Manuscript:	Effects of Dolutegravir (DTG) on Survival, Pupariation and Emergence in <i>Drosophila melanogaster</i> : The Rescue Role of <i>Brassica oleracea</i>
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The manuscript is both scientifically robust and technically sound. The research has significance in alleviating side effects of a well-known anti-HIV drug. Dose response experiments and the results obtained are convincing and the conclusions are valid. However authors should elaborate the significance in the discussion section. For instance, why fly is used instead of a mammalian model like mouse (which would have been more apt)? Of course, natural exposure to the drug is unlikely for the flies. The manuscript is well written, but need a thorough language editing before it can be finalized.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
