

Editor's Comment:

Hello there, after reviewing the manuscript entitled A META-ANALYTIC REVIEW OF THE RELATIONSHIP BETWEEN MATHEMATICS ANXIETY AND THE MATHEMATICAL THINKING OF AFRICA STUDENTS, there are a couple of points that deserve being mentioned,

I agree totally with the remarks of the reviewers.

I considered that the sentence given in the Abstract, **it is highly disheartening to see that, due to Mathematics anxiety, students' mathematical thinking has remained persistently subpar,** needs to be justified, supported by references and I do not see that along the whole manuscript.

In view of the above pointed out, my decision is to publish this manuscript after the minor remarks above mentioned are incorporated.
