

Review Form 1.6

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_93972
Title of the Manuscript:	PHYTOCHEMISTRY AND PHARMACOLOGY OF ZANTHOXYLUM GILLETII: A MINI REVIEW
Type of the Article	Minireview Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journalacri.com/index.php/ACRI/editorial-policy>

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p>	<p>Abstract: In Results Several compounds have been reported from different organs of the plant Plants do not contain organs use parts of the plant. Check for grammar mistakes in sentences All its organs of <i>Z.gilletii</i> are used in traditional medicine and Organs are present only in living things but not non living things like plants Check for grammar mistakes in sentences</p> <p>Introduction: <i>Z.gilletii</i> term bark ?? Leaves decocted are ?? fruits and stem barks?? root and stem bark?? benzophenanthridins, furoquinolines, aporphines Check spellings for all the above and check for grammar sentences <i>Z.gilletii</i> spacing between words specie thanks?????? scientific data seem quite poor till today????</p> <p>Methodology: <i>Z.gilletii</i> spacing between words</p> <p>Results: 10 to 35 mhigh???? theleaves???? showsthat???</p> <p>furoquinoline alkaloids, skim-mianine, the cinnamic acid amide, fagaramide and benzophenanthridine alkaloids, nitidine, dihydrochelerythrine and chelerythrine alkaloids [37], [38]. Check for the names of chemical constituents spellings and also correct the sentences for grammar</p> <p>from <i>Zanthoxylumgilletii</i> have been found to be the source of benzophenanthridins and aporphinestypes that are characteristic of the Rutaceae family [39] [40] [41]. Check for the names of chemical constituents spellings and also correct the sentences for grammar</p> <p>References:</p> <ol style="list-style-type: none"> Osoba, O.A., S.A.
