

### **Editor's Comment:**

The revised manuscript requires substantial revisions on the following flaws prior to be accepted for publication:

1. All the slanted words need to be adjusted for the international readers: such as rabi, crore, lakh, jute.
2. A geographic map of the study area may be helpful.
3. In Table 2, soil temperature should be at 5 "cm" not "m".
4. Also in Table 2 caption, "WB" should be spelled out.
5. Unify the use of "°C" and "degree Celcius".
6. Please check on the sentence, "8.61 t tonnes of grain".
7. The common abbreviation is "l" or "L", not "lit".
8. "Photo. 1" may be changed to "Figure 1".
9. Too many spacing, punctuation, spelling/typing errors have been detected. Therefore, a thorough proof-check and English check is desperately needed.
