PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- Emphasise more on Pre-operative work up like tumour markers, imaging etc- Decrease the write up on surgical procedure, steps and technique, rather brief surgical history is enough- Mention the post operative outcome and recovery- IHC of the operative pathology- Discuss more on adjuvant treatment as well- MDT decision has to be mentioned	
Minor REVISION comments	<ul style="list-style-type: none">- Certain grammatical errors like nephrectomy instead of nehrectomy in discussion- literature review and bibliography have to be recent preferably within 10-15 years- need to know that whether the case is a rare case report or with lap approach it is uncommon??	
Optional/General comments
