PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | | |
| Minor REVISION comments | The authors present a short research on an interesting topic, acute coronary syndromes in women. This is generally a well-written article regarding the angiographic features of women with acute coronary syndromes. I consider that the work is well-structured, and the results are presented properly, but with a basic statistical analysis. I suggest a more detailed presentation of the comorbidities of the patients, limitations. I also consider that the statistical analysis may be improved and please pay attention to the version of the SPSS that was used. | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
